

Nature gives  
Berny keeps

## Nature gives – Berny keeps it fresh

All that nature provides, **Berny** carefully selects and keeps fresh for you. It offers the ultimate pleasure at every opportunity, and selects only the best from nature. The main features of Berny brand are freshness and variety of the selection, divided in Standard and Premium packs. The goal of the brand is to keep the natural taste of fruits and nuts, and as such, the pure, natural product is used as a healthy dietary supplement. Accordingly, **Berny** carefully picks the origin of their fruits and they are processed and packed under strictly controlled conditions, to offer you only the finest and most delicious. **Berny** packs are small but nutritionally strong. Choose **Berny** for better quality of life.

## Captivating and healthy snacks

Today's accelerated pace of life, especially in the urban areas, literally exhausts people. There is not enough time for meaningful meals preparation, and at the same time the fast food industry is fast-growing. Nevertheless, it is important to carefully plan your meals and snacks, in order to equip the body with functionally valuable substances. Therefore, it is useful to recall: what does *Berry* offer, what does the nature offer.

The fruits of walnuts, almonds and hazelnuts are the real sources of high-quality ingredients: unsaturated fat acids, proteins, vitamins and minerals. When combined with dried fruits, such as figs, raisins or apricots, they can be the perfect complement to a meal. *Berry* experienced this long time ago and offers each of us only the best that nature gives. The special value of these fruits is in the contents of minerals (microelements or elements) in traces, such as iron, zinc and copper, which are usually insufficiently taken in through daily diets. Since those are high-energy foods, they should be consumed in the recommended amounts.

Dried fruits are a good source of simple sugars (monosaccharides) such as fructose, the sugar that satisfies desire for sweets, while there are no major changes in the concentration of glucose in the blood, which perfectly makes up for a great loss of energy. Additionally, there is a longer lasting feeling of satiety, and glucose is better exploited as the energy in the cells. Long ago *Berry* learned that the dried fruits are a treasure trove of minerals: potassium, magnesium, calcium, zinc and iron, and vitamins A, B and C. Among the B complex vitamins B1, B2, B3 and B6 are specially distinguished.

## Berny from Bernina

Each **Berny** product represents a premium quality of dried fruits. Complete range of 119 units, at present, is produced in Siroki Brijeg (Bosnia and Herzegovina) in our factory "Bernina". The search for perfection in the area of fruits and vegetables dates back to 1992, when the owner of Bernina in difficult circumstances established the company whose core business is wholesale, import and export of fresh fruits and vegetables.

Listening to the needs of customers, "Bernina" expands its activities in the processing, packaging and distribution of dried fruits and vegetables, nuts, seeds and grains under their own brand **Berny**. Particular attention of our company was then focused on the complete range of packaging products, so given that we were leading brand in the region thanks to the direct import of fruits from produc-

ers around the planet, it was logical that we have the right to expect a place within the wider region and the EU.

Behind the "Bernina" and its brand **Berny** lies traditionally focused business of family Hrkać. Our selection includes fresh and dried fruits and vegetables, nuts, seeds and grains ... focused on a single goal: customer satisfaction with our genuine and healthy products. That is why all our products undergo strict controls of raw materials, based on EU standards, as confirmed by certificates.

Today we employ more than 50 employees, we have sales and storage facilities with the most modern chambers for ripening, storing fruits and vegetables, as well as the high tech packaging lines. Each **Berny** product made in our factory "Bernina" in Siroki Brijeg is ready for the delivery by our own trucks at any time to every european destination.

### Berry production capacity

- Production space area of 1000 m<sup>2</sup>
- Warehouse space with controlled temperature of 3000 m<sup>2</sup>

- Packer standard pillow bags: standard types of packaging bags, weight 30-1000 g capacity of 9600 bags/h

- Packer premium Doy-pack: types of packaging premium zip-lock bags, weight 50 - 1000 g capacity of 4200 bags/h

- Packer for bulk packaging: standard type of pvc packaging, weight 1-10 kg capacity 600 bags/h

All packaging plants are

modernized, equipped with the latest equipment and enabling work under controlled conditions and the formation of various types of bags, different shapes and different sizes.

- Roaster capacity of 1000 kg/h has plant for salting which allows automatic salting of products that guarantees consistent quality.

- Roaster for salty popcorn capacity of 50 kg/h.
